
Sharing facilities at the Barcelona Science Park

Jesús Purroy
Torino, February 19, 2010

Objectives:

- To foster high-quality research backed with a wide range of technology support.
- To bring dynamism to relationships between university and business
- To drive the creation of start-up companies and new institutes
- To promote the science in society dialogue and the scientific vocations

Fundació Parc Científic Barcelona:

With the suport of:

↳ 9 Technology Platforms

PT Plataformes
Tecnològiques

Combinatorial Chemistry
Transcriptomics
Proteomics
Nanotechnology
Crystallography
Animal research
Experimental Toxicology and Ecotoxicology
Drug Discovery

↳ National Genome Analysis Centre

↳ Other scientific services

- Core Scientific Services
- Radioactivity Unit
- Special Reactions Services
- Scientific-Technical Services UB

Research

Competitive projects

PhD students

Service

Contract Research

Self-user/fee-for service

Technology development and validation

Contract Research

Co-development

Access

Four tier (internal/external, public/private)

Fee-for service/contract research/codevelopment

Discounted rates, flat rates

Sharing

Agreements with other institutions

Short stays, visiting researchers

Remote management of projects

Integral animal management

- Rederivation/quarantine
- Breeding
- Experimental design
- Execution (surgery, physiology, phenotyping,...)
- Data analysis
- Reporting

Network of facilities (fish to apes)
Live remote access to breeding facility

EUROPEAN REGIONAL DEVELOPMENT FUND
